

Summer 2026 AI/ML Roadmap

Goal: Build a strong profile for AI/ML and Software Internships.

Main Goals

- Complete NIELIT AI/ML Internship
- Solve 100–120 LeetCode Problems
- Complete 2 Major Projects
- Complete 3 Strong AI Certifications
- Build GitHub Portfolio
- Update Resume and LinkedIn

Priority 1: NIELIT Internship

This is the highest priority. Complete assigned tasks, keep notes, save code, and upload meaningful work to GitHub.

Priority 2: LeetCode

Daily Goal: 3 Questions Per Day

Month 1: Arrays, Strings, Hashing, Linked Lists, Stacks, Queues, Binary Search, Trees

Month 2: Blind 75

Month 3: NeetCode 150

Target: 100–120 solved questions by end of summer.

Priority 3: Music Streaming App (Flagship Project)

Week 1: SwiftUI Basics, Navigation, API Calls

Week 2–3: FastAPI Backend, Song/Search/User APIs

Week 4: Login, Favorites, Playlists

Week 5–6: Audio Streaming and Recommendations

Deliverables: GitHub Repo, README, Screenshots, Demo Video

Priority 4: Sleep Alarm Detector

Phase 1: Research Sleep Cycles

Phase 2: Smart Alarm Suggestions

Phase 3: Add AI Predictions using Scikit-learn

Priority 5: Certifications

June: IBM SkillsBuild – Build an AI Agent

July: Microsoft Learn – Create an AI Agent

August: Google Cloud Generative AI Skill Badge

Optional Afterwards:

- Elements of AI
- AI and Career Empowerment

Priority 6: Doomscroller Controller

Start after the first two projects.

Possible Features:

- Screen Time Tracking
- Doomscroll Detection
- AI-Based Suggestions
- Productivity Dashboard

Weekly Schedule

Monday–Friday

Morning:

- NIELIT Internship (2–4 hours)

Afternoon:

- LeetCode (1–1.5 hours)

Evening:

- Project Work (2 hours)

Night:

- Certification Study (30–45 minutes)

Monthly Targets

June:

- NIELIT Ongoing
- 45 LeetCode Problems
- IBM Certification
- Music App MVP

July:

- 80 LeetCode Problems
- Microsoft Certification
- Music App Complete
- Sleep Detector Started

August:

- 120 LeetCode Problems
- Google Certification
- Sleep Detector Complete
- Doomscroller Prototype

Important Rules

- Do not start all projects at once.
- Complete one project before heavily starting the next.
- Focus on building, not collecting certificates.
- Update GitHub regularly.
- For every 1 hour learning, spend 2 hours building.

Expected Outcome by End of Summer

- NIELIT Internship Completed
- 100–120 LeetCode Problems Solved
- 2–3 Strong Projects
- 3 Recognized AI Certifications
- Strong GitHub Portfolio
- Internship-Ready Resume
